PANKAJ KURADE

ANGULAR DEVELOPER

📞 +91-7411942021 | ✉️ pankajkurade316@gmail.com | 🔗 linkedin.com/in/pankaj-kurade | 📍 Belgaum, Karnataka

PROFESSIONAL SUMMARY

Results-driven Angular Developer with over 3 years of enterprise experience designing, developing, and optimizing high-performance, scalable single-page applications (SPAs). Proficient in designing reusable component architectures, modern reactive programming with RxJS, and seamless backend infrastructure integrations. Expert at turning complex nested data structures into intuitive, pixel-perfect user experiences while collaborating inside fast-paced Agile/Scrum delivery structures.

TECHNICAL SKILLS

Frameworks & Libraries
Angular (v14+), Angular Material, RxJS, PrimeNG, Chart.js, Angular CLI, RESTful Web APIs, SPA Development, Postman

Frontend Architecture & Design
HTML5, CSS3, JavaScript (ES6+), TypeScript, Responsive UI Design, Flexbox, Bootstrap, Wireframing, Figma UI designs

Project Management & Practices
Git/GitHub, Agile Methodologies, Scrum Framework, Sprint Planning, Jira, VS Code

AI & Productivity Accelerators
Cursor AI, GitHub Copilot (Leveraged for rapid prototyping, context-aware debugging, and code refactoring)

PROFESSIONAL EXPERIENCE

Angular Developer | Persistent Systems

Dec 2024 – Present | Pune, MH

Global technology solutions provider delivering high-scale digital engineering and enterprise applications.

- Architected and delivered single-page applications (SPAs) utilizing **Angular 14+, TypeScript, and RxJS**, ensuring robust data handling and highly optimized frontend efficiency.
- Built dynamic client dashboards featuring intricate cross-functional filters and search criteria, improving application data accessibility and end-user onboarding speed.
- Engineered highly consistent, modular, and reusable shared UI elements, minimizing future component lifecycle maintenance efforts and increasing UI consistency across platforms.
- Executed targeted frontend troubleshooting, profiling, and asset code refactoring, successfully lowering core application load times and improving responsive interactions.
- Collaborated actively with Product Owners, Backend Engineers, and QA professionals within **Agile/Scrum** patterns to guarantee timely delivery of business-critical functional requirements.

Project Highlight: Unity Next (Cloud-Based Clinical QC Data Management Platform)

- Developed core modules for Bio-Rad's clinical laboratory cloud platform, supporting advanced capabilities like multi-code tracking, bulk layout mappings, and unified drill-downs.
- Engineered a robust, shared entity-map infrastructure leveraging **base-class component inheritance** to map high-frequency analytical data structures over a strict 3-level tree (Instrument → Control → Analyte).
- Designed and implemented a modular **Multi-License Feature** framework featuring precise UI visibility gates and permission tier routing rules to adapt layout states dynamically per active client account.

Frontend Developer | Peol Technology Pvt Ltd

2022 – 2024 | Bengaluru, KA

Enterprise consultancy specializing in comprehensive SAP solution architecture, custom applications, and core advisory.

- Developed a high-volume renewable energy asset monitoring web application, accelerating purchase order execution and structural workflow metrics.
- Built data-driven analytics views to process, capture, and track active metrics compliance against international green energy targets.
- Integrated production-ready RESTful APIs to ingest large streaming telemetry datasets, establishing reliable and automated near-real-time analytics dashboards via **Chart.js**.
- Implemented fully automated background reporting workflows, significantly diminishing human reporting data error margins.

Project Highlight: ELIPO (Accounts Payable Invoice Management Solution)

- Designed the primary platform architecture providing accounts teams with live tracking visibility across the full settlement cycle of incoming invoices.
- Created rich vendor grids and interactive detail profiles employing dynamic Angular structural bindings to load real-time accounting audits, precise tax line splits, and multi-tier manager approval states.

EDUCATION

B.E. in Computer Science & Engineering	Gogte Institute of Technology, Belgaum	Graduated: 2021
Diploma in Computer Science	R.N. Shetty Polytechnic, Belgaum	Graduated: 2018
Secondary School Certificate (SSC)	Kendriya Vidyalaya, Belgaum	Completed
